

MPC EXPANSION INSTALLATION GUIDE USING MPC SOFTWARE

This guide explains how to install how to install MPC Expansions into MPC Software or MPC Beats software. Please follow these steps :

1/ Extracting the files : once you download your Expansion on our site, you will receive a zip file on your computer. You will have to extract the zip file into a location of your choice on your computer. Use your computer's zip application to extract the files from the zip file.

You will find 2 folders : one folder is named « STANDALONE FILES » and the other folder is named « XPN FILE ».

2/ Identify the .XPN file : open the folder named « XPN FILE » and locate the .XPN file in the folder.

3/ Launch the MPC Software/MPC Beats application on your computer.

4/ Drag and drop the .XPN file into the grid of the MPC Software/MPC Beats. Do not copy and paste the XPN file but Drag and drop it. It is important that you drag and drop the XPN file into the grid of the MPC Software/MPC Beats and not in other aereas of the MPC application

5/ Expansion Import process : after dragging the XPN file into the grid of the MPC Software/ MPC Beats application, a window labelled « Expansion Pack Import » opens up in the application. Click on the import button at the bottom right side of the window,

6/ Browse your new Expansion : Expansion import proccess starts and MPC Software/MPC Beats will close the import windows after finalising the import of your Expansion. Your added Expansion will now show up in the Expansion Browser as well as in the Media Browser of the MPC Software/MPC Beats.
